SELECTIVE ISOLATION OF STYRENE FROM UNREFINED BENZOL FRACTIONS. [1962]6p.
Order from OTS or SLA \$1.10 62-33230

Trans. of Czech patent 89,975, 15 May 59.

DESCRIPTORS: *Styrenes, Separation, Selection,
*Benzenes, Fractionation.

A method was found for selective isolation of styrene from unrefined benzol fractions boiling at 135-175°C. These fractions are treated with mercury acetate in methanol and resulting β -phenol- β -methoxy-mercur ethanol acetate is decomposed with sodium chloride to the corresponding chloride. The chloride is steam distilled from acidified mixture to give a monomeric styrene. (Author)
